

Declaration of Harmlessness

Employment of recycled plastics in HAHN Kunststoffe products

In HAHN Kunststoffe products different fractions of recycled plastics from the German Dual System are employed in accordance with the Product Recycling and Waste Management Act of 1994.

The recycled plastics used in manufacturing are processed corresponding to a composition patented for HAHN Kunststoffe.

HAHN Kunststoffe products are highly environment-friendly, contamination caused by these products can be excluded.

hanit[®] products are subject to permanent material testing performed by predestined institutes such as the Chemical Research Institute Bergisches Land in Wuppertal, Germany. The established test readings are well below the permissible limits. As far as heavy metals are concerned only traces can be detected.
